Why do they rock?

- Implemented 3-stream waste diversion
- Food waste is managed innovatively and efficiently
- Staff wear organic fair-trade uniforms

1. Waste is minimized from the start

Nature's Emporium is working towards reducing packaging & plastic waste from the start. Sit & enjoy a meal with reusable cutlery, stock up on your zero-waste needs, and focus on fresh, organic produce next time you shop!

2. They get crafty with food surplus

Diverting as much as possible, NE is using food that's not on the shelves in their smoothie or in their hot bar - creating everything from apple chips to bread crumbs - if it's not being repurposed, it's getting composted.

3. Dressed for Success

When your employees are representing your business, what better way than to have them stand for fair-trade, sustainable and organic practices.

Next Steps:

We're looking forward to EV parking, and more effective communication to have customers help divert waste. There are more opportunities coming up to educate employees and customers on Zero-Waste living!
