## What makes them stand out:

- From the bag to the straw, Boon Burger focuses on reducing waste as much as possible by offering reusable, or compostable & recyclable items
- They advocate for foods that are good for your health, the planet and that are produced ethically
- Their Southwest Crunch burger won Burlington's Novemburger contest!

### 1. Do you get any reactions from your waste reduction practices?

"I feel these days people are more aware of the waste they're producing. When we notify customers, they are usually either surprised or very pleased! We have stations around the restaurant for compost and recycling, so sometimes we have to help and let people know where to properly dispose of items. But then we see them pass that info along and it's all worth it!"

### 2. We hear you have some big plans for Earth day!

"We are very excited for Earth Day this year! We are putting together a team of staff and customers who are interested in doing the annual Clean Up for the downtown area. We love our neighborhood and want everyone to enjoy all it has to offer! It's a nice way for us to give back to our community and enjoy some time with each other."
