

COMMUNITY SPOTLIGHT

Beth's Story

"Getting involved with BurlingtonGreen has opened doors and given me many lifetime opportunities. Because of my amazing co-op experience working with them, I am pursuing a career in the environmental sector!

I appreciate the patience and willingness to share knowledge, and the focus on outreach and awareness. Everyone at BurlingtonGreen shares a gift for getting people involved in the community and interested in the environment. I remember learning about so many different volunteering opportunities and being so surprised by the variety of ways that I can make my city a better place to live.

I really liked going into the Marsh at RBG to remove an invasive grass species, it was a really fun adventure. I got to put on some rubber overalls and learn about my local wetland! I had so much fun during my co-op and I am so fortunate to be a part of the environmental movement in Burlington."
