

# Nature Near Home

November 2022

Connecting with nature helps improve our mental and physical health. Discover ways to connect with and learn about nature near home.

## Tell us what you think about Nature Near Home!

Please complete our short anonymous survey by phone or online. Go to <https://bit.ly/NatureNearHomeSurvey> or call 647-453-1404 between 9 am and 5 pm Monday to Friday to answer a few questions.

Thank you for sharing your valued feedback!

**Our local 'snowbirds' - Dark-Eyed Juncos.** This beautiful bird visits our region each fall/winter. Spot them flitting around near the ground and perching low in trees and bushes. Look for them on the edge of trails or walking paths lined by bushes and trees, in yards and parks, or at feeders. When they fly, their bright white tail edges flash. In spring /summer they head up north to mate and raise their young.

**Try Native Plants & Animals Bingo!** How many native plants and animals can you spot out your window or during your walks outside? Plants & animals native to our area help ensure biodiversity to maintain a balanced eco system -- supporting birds, chipmunks, rabbits, foxes and our threatened pollinators, like bees and butterflies.

**Start now!**

Practice a safety-first approach including Halton COVID-19 safety guidelines to ensure your personal safety and those around you, before choosing to participate in any activities or tips shared by BurlingtonGreen.

House  
Sparrow

## HOW TO PLAY

Take a walk or look out your window and see if you can spot these Canadian and local native plants and animals. Put a check next to each you see. Can you find 5 in a row? Have fun!
